

Not all ADA signs are created equal or compliant. We manufacture all our signs to the highest quality standards in the industry. Below are the specifications and materials we use in manufacturing our signs.

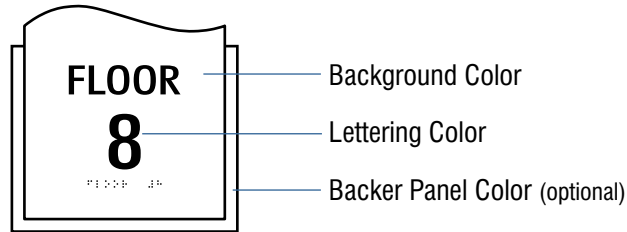

- Durable non-glare modified acrylic. Impact and mar resistant. UV Stable.
- Distinct contrast between background colors and graphic colors.
- Integral subsurface colors with superior resistance to fading and scratching. Not front painted.
- 1/32” raised graphics are bonded to the surface under extreme pressure with 3M VHB.
- Clear, domed shaped Raster Braille (Grade II) is embedded into the sign surface.
- A 3/8” minimum margin around all raised elements, including Braille.
- Sans serif font, between 5/8” and 2” in height. All uppercase.
- Signs are 100% compliant with both Federal ADA and State of California regulations.

→ Graphic Options

Below are the various materials and graphic processes we use to manufacture our signs. Signs that identify a room or space must have raised letters and Braille. Most material is available in 1/8" or 1/4" thickness. Custom materials are available.

Standard Materials

Graphic Processes

Modified Acrylic (Ultramattes)	ADA / Braille	Digital Print	Vinyl Graphics	Raised Graphics	Window Slot	Subsurface
Non-Glare Acrylic (Backpainted)	ADA / Braille	Digital Print	Vinyl Graphics	Raised Graphics	Window Slot	Subsurface
Digital Background	ADA / Braille	Digital Print	Vinyl Graphics	Raised Graphics	Window Slot	Subsurface
ADA Alternatives	ADA / Braille	Digital Print	Vinyl Graphics	Raised Graphics	Window Slot	
Anodized Aluminum (2)	ADA / Braille	Digital Print	Vinyl Graphics	Raised Graphics	Window Slot	
Wood Laminates (4)	ADA / Braille	Digital Print	Vinyl Graphics	Raised Graphics	Window Slot	
Transluents (3)	ADA / Braille	Digital Print	Vinyl Graphics	Raised Graphics		
Frosted Acrylic P95	ADA / Braille	Digital Print	Vinyl Graphics	Raised Graphics		
Matte Green Edge 3030	ADA / Braille	Digital Print	Vinyl Graphics	Raised Graphics		
Photoluminescent	ADA / Braille	Digital Print	Vinyl Graphics	Raised Graphics		

ADA / Braille

Precision cut raised letters and graphics are bonded to the surface with 3M VHB. Braille is embedded into the surface.

Digital Print

High resolution, full color graphics are printed directly to the substrate. Good for logos and custom graphics.

Vinyl Graphics

High performance 3M vinyl can be applied to any material for a clean looking sign not requiring raised letters.

Subsurface

Graphics are produced on the backside of the material by reverse engraving, vinyl graphics or digital printing.

Raised Graphics

Precision cut raised letters and graphics are bonded to the surface with 3M VHB. Braille is not included.

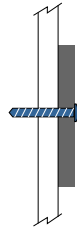

→ Mounting Options

Our standard mounting options are shown below. Always test the appropriate mounting technique before actual installation. We recommend using a high quality silicone adhesive in conjunction with most of the mounting methods below.

Double Faced Tape

Pressure sensitive foam tape. Use in conjunction with silicone adhesive.

Screw Holes - Torxs

3/16" screw hole with optional 1.5" vandal resistant button torx.

Countersunk Holes - Torxs

3/16" screw hole with optional 1.5" vandal resistant flathead torx.

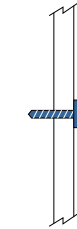

Magnetic Tape (Foil)

1/32" Magnetic tape for steel surfaces. Sign not to exceed three pounds.

Velcro Hook (Loop)

For fabric surfaces such as office work stations. Always test first.

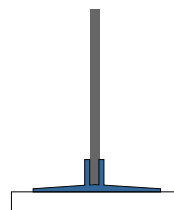

Standoffs

We offer both premium and economy styles in various sizes and finishes.

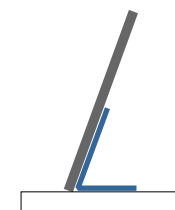

Partition Hook

Both stock and custom hangers available for any size partition.

Counter or Partition Bracket

Available in 8", 10" or 12" lengths. Sign should be no taller than 10" in height.

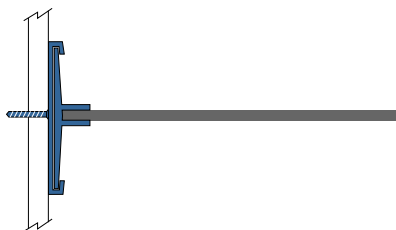

Pedestal Stand

A piece of 1/8" Acrylic is bent and attached to the sign to form a easel like stand.

Wall or Ceiling Bracket

A bracket is mounted perpendicular to the wall or ceiling.

Hanging Clips and Cables

A number of hanging options are available from simple chain to architectural cables and hardware.
